At page 4 of the Office Action, it is stated that upon applicants' election of a single species "a generic concept, inclusive of the elected species, will be identified by the Examiner for examination." Applicants submit that it is improper for the Examiner sua sponte to identify what is the claimed invention, such as by creating a "generic concept" other than the invention presented by applicants in their claims. Such procedure is violative of the applicable law (see, e.g., In re Weber, 198 USPQ 328, 331-332 (CCPA 1978)) and contrary to the Patent Office's own procedures as outlined in MPEP 809.02, et seq. Applicants request compliance with MPEP 809.02 (c) such that if applicants' elected species is found to be allowable, then the Examiner should issue a complete action on the merits of all claims presented by applicants that read on the elected species.

Respectfully submitted,
